N/A

(j) Contracts for difference

N/A

(k) Exchange traded products

N/A

(l) Emission allowances

N/A

(m) Other instruments

N/A

Summary

Asset Management One International (hereafter, AMOI) executes orders in several asset classes on behalf of a wide range of institutional clients, primarily located in Europe, Middle East and Asia. Orders are executed at all times in accordance with AMOI's Order Execution Policy. Asset classes for which no data is presented in this document were not traded by AMOI in 2020. AMOI does not execute orders for retail clients.

For execution of orders in equities, AMOI considered primarily quantitative factors when assessing the quality of execution. The quantitative factors considered by the firm when assessing quality of execution were price (measured by the deviation from a pre-set benchmark such as volume-weighted-average price or VWAP) and brokerage cost, as well as order size. However, for less liquid orders or in the case of specific orders likelihood of execution can take priority over other factors.

A breakdown of top 5 counterparties by tick size liquidity bands (using FCA FITRS table for Tick Band Size) is available in the Appendix. The majority (over 70%) of our trading by both volume and value is captured under tick size liquidity bands 1 and 2 based on the FCA FITRS classification. This is because the vast majority of instruments traded by AMOI have a primary listing outside the UK/EU (mainly in Japan). AMOI find that the FCA / FITRS classification of such securities into tick size liquidity bands is not generally indicative of underlying liquidity in the primary market.

For execution of currency derivatives and debt instruments, AMOI considered primarily quantitative factors (cost, price), as well as likelihood of execution given liquidity constraints, settlement risk and finally counterparty risk when assessing the quality of execution. All currency derivatives orders during 2020 were executed on a Multilateral Trading Facility as were most debt instruments. A small number of orders in debt instruments were executed away from the Bloomberg MTF in order to achieve best execution, as set out in the best execution policy. The first debt instrument table shows this break down and the subsequent table provides greater transparency by disclosing the identities of the top 5 counterparties of all debt instrument trades, regardless of venue. In the current year, we expect the majority of trades to be executed on a Multilateral Trading Facility.

For execution of equity derivatives orders, AMOI considered likelihood of execution, counterparty risk and settlement risk as primary execution factors, as cost and price obtained were deemed comparable across the market.

AMOI uses internal analysis in order to appraise the quality of execution for all asset classes. The primary source of data used for internal analysis of quality of execution is Bloomberg. AMOI also uses an external TCA (Transaction Cost Analysis) tool for

Additional disclosure

Asset Management One International Ltd. is majority owned by Mizuho Financial Group. Mizuho International PLC and Mizuho Bank Ltd. are also majority owned by Mizuho Financial Group. AMOI uses the same criteria when assessing the quality of execution from all execution venues (counterparties), including any related entities. AMOI has no specific arrangements with any execution venues regarding payments made or received discounts, rebates or non-monetary benefits received.

Appendix

(a) Equities

i. Tick size liquidity band 5 and 6

Class of Instrument	Equities – tick size liquidity band 5 and 6	
Notification if < 1 average trade per business day in the previous year	N	
Top five execution venues ranked in terms of trading volumes (descending order)	Proportion of volume traded as a percentage of total in that class	Proportion of orders traded as a percentage of total in that class
UBS (BFM8T61CT2L1QCEMIK50)	53.31%	52.20%
CITIGROUP GLOBAL MKTS Ltd. (XKZZ2JZF41MRHTR1V493)	45.98%	44.51%
