

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# AMO AI Deep Learning Global Equity Portfolio (the "Sub-Fund")

**Class II USD ACC (LU1851274271) (the "Share Class")**

**A Sub-Fund of AMO UCITS Fund (the "Fund")**

**Management Company: Carne Global Fund Managers (Luxembourg) S.A.**

## Objectives and Investment Policy

### Objective

The Sub-Fund aims to outperform the MSCI ACWI Index (net of tax with dividends reinvested), through a quantitative approach by investing in global equities.

### Principal Investment Strategy

The Sub-Fund invests at least 80% of its net asset in equities listed in developed and emerging markets, into depositary receipts, closed-end REITS and other equity-like investments.

The Sub-Fund is managed with a quantitative approach powered by a proprietary deep learning model. The model primarily uses financial data of investable stocks as input data. Based on its own learning and rules, the model computes attractiveness of stocks based on their predicted future return. The portfolio is constructed using a portfolio optimizer.

Eligible investments for the Sub-Fund are not limited to sectors, industries or geographies. Investments into Smaller Companies as well as investments into Emerging Markets

might exceed at times 20% of the net asset value of the Sub-Fund.

The Sub-Fund will not hedge the currency exposure between the underlying assets and the reference currency of the Sub-Fund.

### Investment Horizon

The Sub-Fund is suitable for investors who seek capital growth over the long-term and who can afford to set aside the capital invested for at least 3 to 5 years.

### Distribution policy

This Class is a Capitalisation Share Class. Capitalisation Share Classes retain and reinvest all net income. In this regard the income is retained in the net asset value and reflected in the net asset value per share of the relevant class.

### Dealing Frequency

You may sell shares each day that is a bank business day in Luxembourg, London and the United States (except Good Friday and 24 December of each year).

## Risk and Reward Profile

This indicator above is based on simulated historical data and may not be a reliable indication of the future risk profile of the Sub-Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean a risk free investment.

This Fund is in risk category 5 because of the high range and frequency of price movements (volatility) of the underlying investments in which the Sub-Fund invests.

The Sub-Fund may be subject to risks which are not included in the calculation of the risk-reward indicator associated with the following:

**Equity Risk:** The Sub-Fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

**Investments in Smaller Company shares:** The Sub-Fund buys shares in smaller companies. It may be difficult to sell these shares, in which case the Sub-Fund may not be able to minimise a loss on such shares.

**Emerging Markets Risk:** Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Sub-Fund.

**Currency Risk:** The Sub-Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.

**Liquidity Risk:** A Sub-Fund may encounter difficulties to pay repurchase proceeds within the time period stated in the prospectus as a consequence of unusual market conditions or unusually high volume of repurchase requests.

**Counterparty Risk:** The Sub-Fund may suffer losses if the parties that it trades with cannot meet their financial obligations.

**Risk of Concentration:** Investments are made in a limited number of companies which makes the Sub-Fund more vulnerable to fluctuations in the value of those investments.

The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.

For more information on these and other risks see the section "Risk Considerations" in the Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

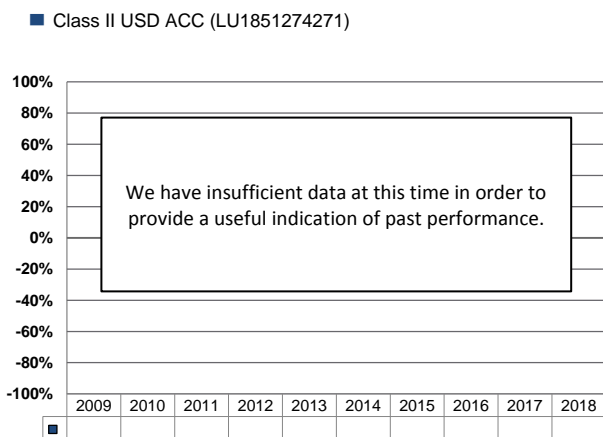

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
A dilution levy of up to 0.30% of the subscription or redemption amount may be charged if, on any Valuation Day, subscription or redemption requests received exceed 10% of the net asset value of the Sub-Fund.	
Charges taken from the Sub-Fund over a financial period	
Ongoing charges	0.75 %
Charges taken from the Sub-Fund under certain specific conditions	
Performance fee	None

The ongoing charges figure shown here is an estimate of the charges as the Share Class has not been priced for a full financial year twelve months period.

The Fund's annual report for each financial year will include details on the exact charges made. The amount charged may vary from year to year.

More information about charges can be found in the "Fees and Expenses" section of the Fund's Prospectus.
